

PROMINENT MINING CONTRACTOR SINCE 1993

Company Profile

2023

CLIENTS TRUSTED US

WWW.SAMIROCK.COM

How **Sami Rock** developed from a home-based business into a leader in our industry, is a story that I recall with pride and satisfaction.

I founded Sami Rock in **1993** with the help of just one partner, and we operated from a small apartment with all rented equipment and machinery.

Through the grace of Allah and a lot of hard work, we have grown into a sizeable operation with a top reputation in the rock cutting business. We own a large fleet of equipment worth tens of millions of Saudi Riyals which is operated by a team of highly qualified engineers and technicians.

The high levels of trust that our clients place in us is something we take very seriously as we continuously strive to innovate and improve our service levels. We have high ambitions for future growth by becoming the recognized leader in our field.

We aim to set the benchmark of professional industry standards by which our competition will be measured. And there are lots of competitors trying to copy our unique methods. We are aware of the challenges we face in this competitive environment. With the grace of Allah, and with our strong commitment to the training and development of our teams, we know that we can meet these challenges.

Our people are continuously being trained in how to operate conventional and non-conventional equipment to achieve the highest level of productivity while preserving our precious environment.

The ambitious **VISION** of **SAMI ROCK** that accompanied its leaders during its challenging journey since inception seeks to take the leading position in the execution of mining and semi-mining projects in the Arab region (**Middle East and North Africa**). And is working to develop the mining industry in the Arab region to achieve optimal utilization of its mineral wealth through the provision of specialized support services to international quality standards.

SAMI ROCK was able to execute various projects in Makkah, Taif, Jeddah, Madinah and Tabuk (silica mine belonging to Mahmood Saeed Glass Factory), as well as few mining exploratory excavation projects and various mining projects, geological and mining studies among them conducting all geological studies, hydro-geological, geophysical, surveying studies, exploration drilling, mining studies.

SAMI ROCK was founded in 1993 as a sole proprietorship engaged in contracting, specifically since its foundation the establishment took on its shoulders the execution of earthmoving contracts.

Its owner **Engr. Sami Abdulrahman Albakri** had distinguished experiences at this field moving up the ranks in the mining industry of Saudi Arabia specifically in MHAD DAHAB GOLD MINE which later became **MA'ADEN** company as well as **SAUDI CHEMICAL COMPANY** and **ABV Rock Group** in Saudi Arabia.

SAMI ROCK was able to execute most difficult and critically dangerous express large size projects successfully due to the following factors:

- Access to new technologies in rock cutting and mining.
- Excellent human talents.
- Earned reputation in cautious blasting.
- In-house fleet of Equipment with operators.
- Cross border experience, Africa and Jordan.
- Developed a Costing structure which has become an industry benchmark in KSA
- Quality and depth of management, company has highly experienced and professional team of engineers.

Survey Division

Survey and Quantities division plays a highly important and leading role within Sami Rock.

This division is responsible for all survey measurements, conducting longitudinal and cross sections, calculation of cutting volumes, conducting mesh leveling and topographic, contour and geological maps for various engineering purposes. In addition, the division conducts survey studies for geological and mining works, including drafting of contour maps for mineral deposits and structural beds in cooperation with the geological studies division. In addition, this division supplies the landscaping & studies division with survey and topographic maps. These maps help them in developing new real estate landscapes as one of Sami Rocks Rock activities in contracting sector.

Survey works division is supervised by a selection of skilled and highly experienced engineers and surveyors. Activities in this division are carefully planned, starting with project inspections and ending with accurate survey measurements. The division produces accurate and realistic maps for rock cutting.

Blasting Division

Sami Rock blasting works is done by a team of professional and licensed blasting experts. With their unmatched experience and first class licensees, they can achieve various kinds of civil blasting, including controlled, highly- controlled or free blasting. They use advanced tools to achieve the required output, including:

Vibrometers

Ammeters

Blasting batteries with variable capacities, depending upon array of perforation mesh.

Blasting division is equipped with special trucks for transporting explosives for civil purposes to worksites. Trucks are designed to the required specifications and standards of the Saudi Weapons and Explosive Police Department.

To achieve utmost results at worksite, we are implementing the strictest safety standards compared with those applied by the Saudi Weapons and Explosive Police Department. Sami Rock adopts the safest and most economical methods in using explosives. In addition, we apply the approved civil blasting theories using rubber covers that prevent rocks scattering. Accurate ignition intervals are utilized to reduce vibrations to the minimum accepted level, which would eliminate any risks to people or properties.

Mining is a strategic business to Sami Rock, which has contracted with Daynatec Drilling Inc. to explore phosphate at Wadi Um Al Waal in the Northern Region of Saudi Arabia. Sami Rock has successfully developed its mining operations in the Kingdom and abroad.

Sami Rock created its **Geological Studies Division** in 1999. The division is concerned with examining rocks and their characteristics and hardness, in addition to studying geological features (faults, cracks, fractures, folds, slides) at rock cutting locations to avoid any future difficulties. The division is supervised by a team of highly qualified and highly experienced engineers and geologists.

This division has conducted studies lately for oil deposits at Al Lujoon area in Central Jordan. The purpose was to evaluate reserves and oil volumes in rocks to decide the feasibility of oil investments in the area.

Heavy equipment division was launched in the year 2003, when Sami Rock realized the huge demand for such services in the Saudi market. Sami Rock obtained the exclusive dealership rights for products of the Korean company: Daewoo Heavy Industries. Products such as perforation shovels, rock breaking hammers and consumable drilling bits are among the many products Sami Rock promotes.

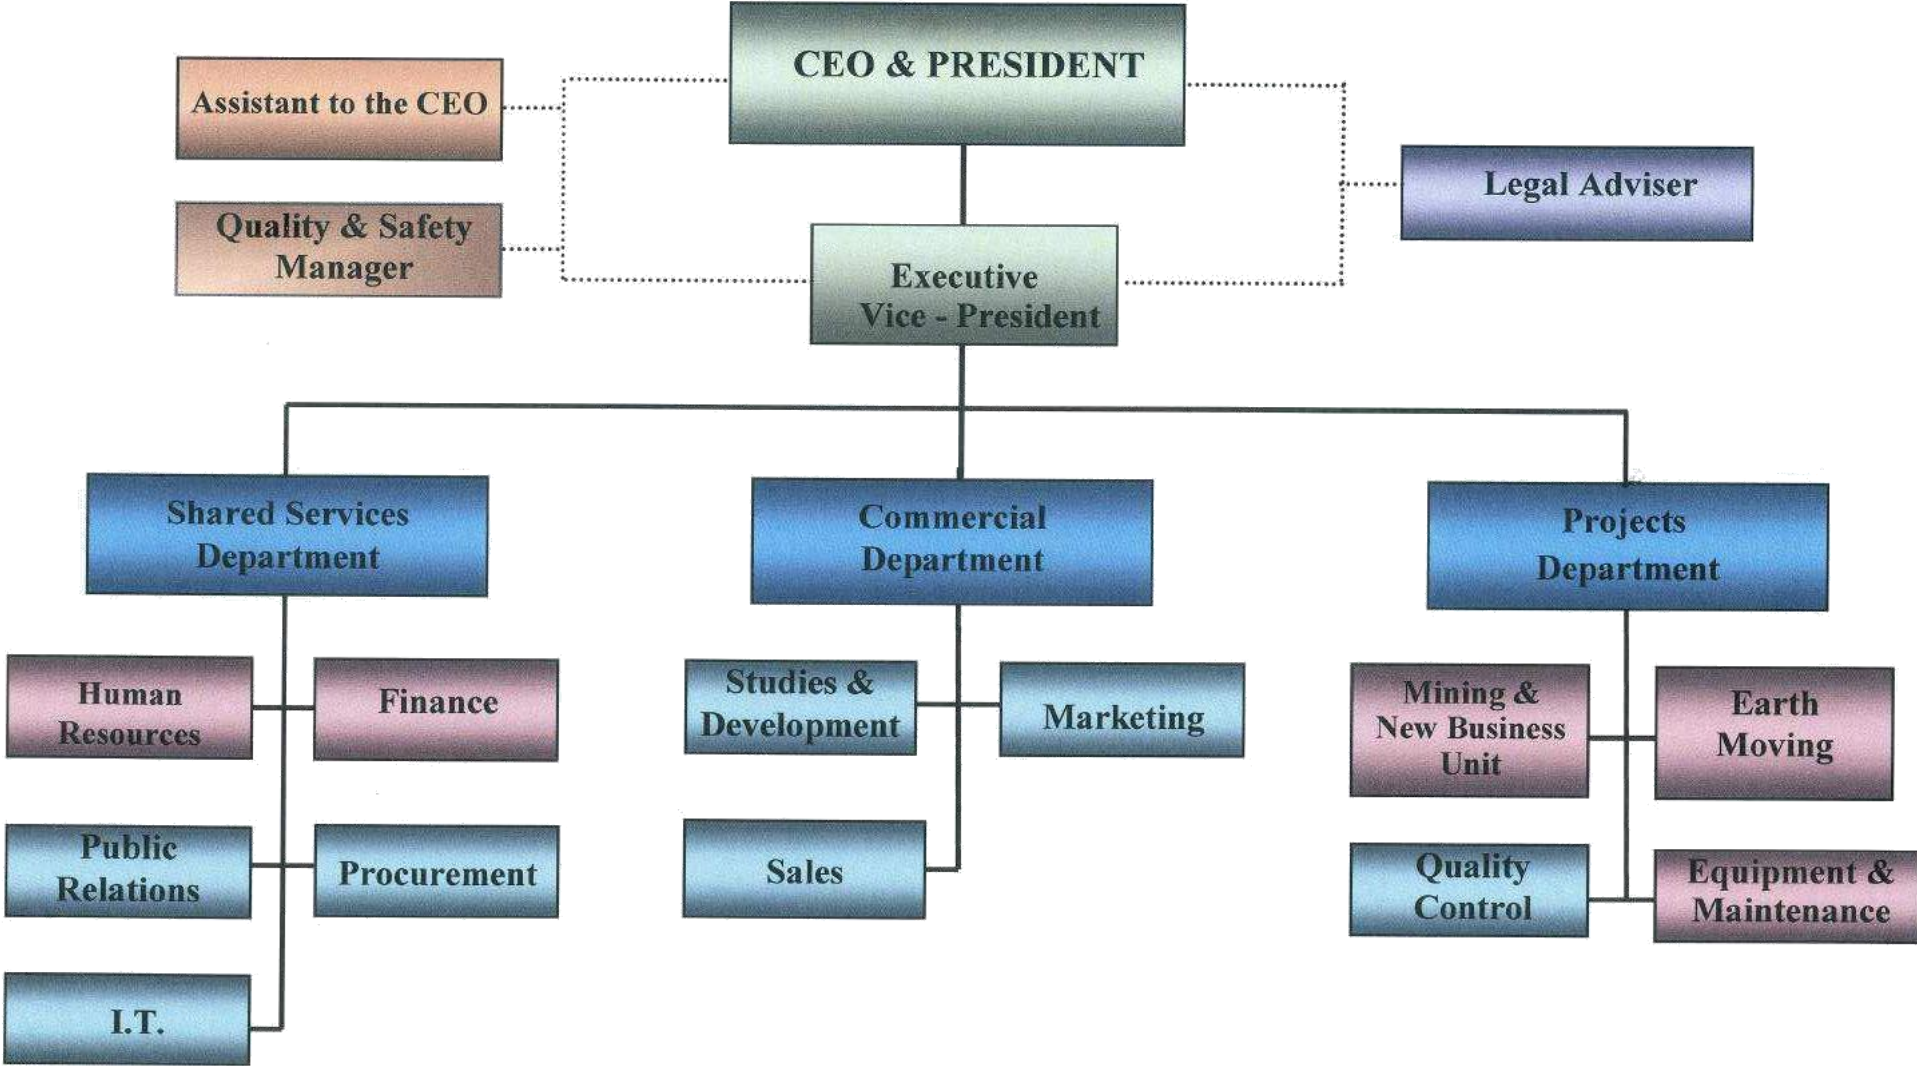

Sami Rock is also cooperating with other Korean companies such as:

- > **Hydraulic Crawlers Drill Co.** - Produces hydraulic perforation machines.
- > **Ville Industrial Engineering Co.** - Produces hydraulic hammers of all sizes for excavators up to 4,000 kgm.
- > **Thomas Co.** - Excavation accessories are imported for all kinds of spare parts, while the heavy equipment division produces light spare parts which support main imported spare parts.

Chemical Agents Division

This advanced chemical material is used for rock cutting. Sami Rock imports this material to the Saudi market from several sources as a safe alternative to explosives. When poured into the drilled hole and mixed with water, it expands and exerts tremendous pressure that fractures rocks and makes it easy to break with excavators. Chemical Agents Division employs specialized field teams to conduct works for clients.

SAMI ROCK COMPANY LTD.
ORGANIZATIONAL STRUCTURE

SamiRock, it is:

64.5 millions cm³ rock cutting

47 Total Projects

34 Projects in Makkah

" شهادة إنجاز وحسن تنفيذ عمل قطع صخري "

تعن شركة عبدالله أبار وأحمد زيني وشركاهم ملاك مخطط الأجاويد بجده أنها عقدت إتفاقين ووقعت عقدين مع "مؤسسة سامي للصخور" للقيام بأعمال تهذيب الجبال والتلال الصخرية بالمخطط وتفجير وتفتيت الصخور بإستعمال المتفجرات للوصول الى المناسيب المطلوبة لأعمال التمهيد والتسوية للمخطط . وقد أوفت "مؤسسة سامي للصخور" بالتزاماتها ونفذت العمل المطلوب منها لكل من العقدين حسب الأصول الفنية وحسب شروط العقدين وفي الزمن المحدد لكل عقد وذلك من غير تأخير أو مشاكل فنية أو إدارية تعيق العمل .

وتقديرًا من شركة عبدالله أبار وأحمد زيني لهذه المؤسسة وحسن تنفيذها لإلتزاماتها بموجب العقدين فقد أعطيت لها هذه الشهادة .
ونسأل الله لها ولصاحبها التوفيق ودوام الإلتزام بحسن التنفيذ في كل أعمالها ومشروعاتها .

عن شركة عبدالله أبار وأحمد زيني والملاك

أحمد عباس زيني
المدير العام

التاريخ : 1429/06/03 هـ

الموافق : 2008/06/07 م

شهادة حسن تنفيذ لمن يهمه الأمر

تشهد شركة عبد اللطيف جميل للإستثمارات العقارية المحدودة أن شركة سامي للصخور قامت بتنفيذ أعمال القطع الصخري لمشروعها بجبل الكعبة - M215 بواسطة إستخدام المتفجرات (تخريم وتفجير) والمعدات الهيدروليكية الثقيلة لكمية قطع صخري إجمالي حوالي 1,100,000 متر مكعب تم الإنتهاء منها في شهر سبتمبر 2007م

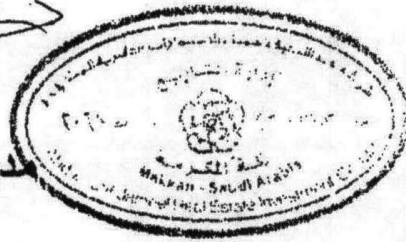

وقد قامت شركة سامي للصخور المحدودة بتنفيذ العمل الموكل إليها حسب المواصفات والإشتراطات الفنية المعمول بها في تنفيذ مثل هذه المشاريع.

وهذه شهادة حسن تنفيذ من شركة عبد اللطيف جميل للإستثمارات العقارية المحدودة لشركة سامي للصخور المحدودة بدون أي مسئولية على شركة عبد اللطيف جميل للإستثمارات العقارية المحدودة.

والله الموفق ،،،

م/ شريف البحار

مدير مشروع جبل الكعبة

شهادة حسن تنفيذ لمن يهمله الأمر

تشهد شركة محمد بن لادن أن شركة سامي للصخور المحدودة قامت بتنفيذ أعمال القطع الصخري لمشروع تطوير وقف الملك عبدالعزيز للحرمين الشريفين بكافة ملحقاته بواسطة استخدام المتفجرات (تخريم وتفجير) والمعدات الهيدروليكية الثقيلة لكمية قطع صخري إجمالية حوالي ٣١,٧٥٠,٠٠٠ م^٣.

وقد قامت شركة سامي للصخور المحدودة بتنفيذ العمل الموكل إليها حسب المواصفات والإشتراطات الفنية المعمول بها في تنفيذ مثل هذه المشاريع.

وهذا شهادة حسن تنفيذ من شركة محمد بن لادن لشركة سامي للصخور المحدودة بدون أدنى مسئولية على شركة محمد بن لادن .

شركة محمد بن لادن

شهادة حسن تنفيذ

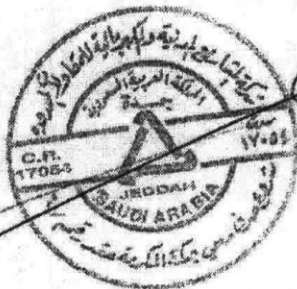

الى من يهمه الامر

تشهد شركة المشاريع و الكهربائية للمقاولات (سبكو) بأن السادة / شركة سامي للصخور المحدودة التزمت بتنفيذ بنود العقد الموقع بيننا على أعلى مستوى من الجودة من الناحية الفنية و ضمن المدة المطلوبة بالإضافة الى تطبيق قواعد الأمن و السلامة مما ساهم بفضل من الله عدم وقوع أي حوادث رغم خطورة و صعوبة الأعمال و التي تشمل انشاء نفق صرف صحي بطريقة التخريم و التفجير على أعماق تتراوح من 25 م الى 50 م بقطر يتراوح من 4 الى 5 أمتار بطول 400 متر .

و الله و لى التوفيق

شركة المشاريع المدنية و الكهربائية للمقاولات
